

One Brand. Every Journey.

From Mountain High to River Wide —

TREKA™

Performance Engineered Apparel

Designed for optimal performance and comfort in diverse conditions. Utilizing advanced materials and ergonomic designs, our range provides the durability and functionality essential for every expedition, from alpine ascents to rugged trails.

Precision-Built Outdoor Gear

Engineered for reliability and resilience. Our selection, including robust shelters, efficient navigation tools, and ergonomic packs, is rigorously tested to ensure unparalleled performance in the most demanding environments. Trust in gear that's built to withstand the elements and enhance your journey.

Your Adventure, Fully Equipped

Our products are built for durability, comfort, and performance. Whether you're chasing the sunrise on a mountain trail or unwinding by the riverside, trust in our quality to enhance every aspect of your journey, ensuring you're prepared for whatever lies ahead.

FOUNDERS NOTE

Designed for Extraordinary Journeys

**TREQA™: Built for real people. Designed for real adventures.
Ready for real life.**

At TREQA™, every piece of outdoor apparel and gear is a reflection of our commitment to thoughtful design, innovation, and social responsibility. We believe in creating products that not only perform but also align with our values. That's why we are proud to be 100% cruelty-free, down-free, hypoallergenic, and vegan-friendly. Our gear is designed to protect both adventurers and the planet.

With an unwavering focus on comfort, durability, and protection, TREQA™ empowers you to connect with the natural world. Whether you're scaling rugged peaks or enjoying serene lakesides, our apparel enhances every moment of your outdoor journey.

Nepal is more than an inspiration – it's a partner in our mission. Its breathtaking landscapes and resilient communities motivate us to create exceptional outdoor essentials while fostering meaningful relationships and supporting local communities. Through this partnership, we strive to give back and create positive impact where it matters most.

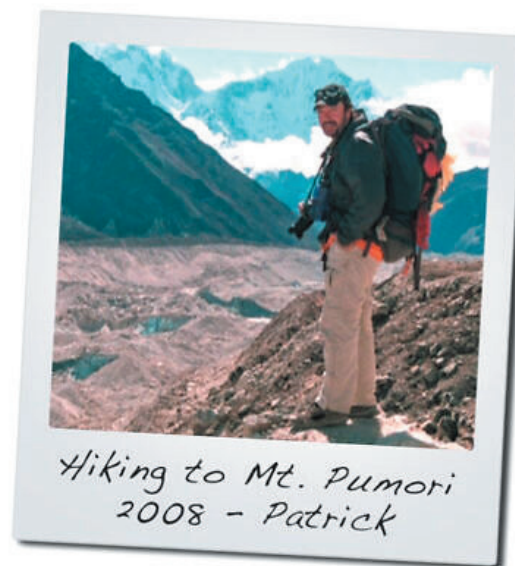

Our products are built to deliver real durability, real performance, and real results. Our motto, "Follow No One," embodies independence, adventure, and the courage to carve your own path. Every step you take is a story, and every trail you blaze is a testament to your unique journey.

At TREQA™, every adventure is personal, and every journey is worth celebrating. We stand with you as a trusted companion, offering ethical, sustainable gear that's as reliable as it is responsible.

Join us in embracing the spirit of adventure. With every summit conquered and every memory made, let TREQA™ inspire you to "Follow No One."

Sincerely,

TREQA™ Founder
Patrick Grillo

THE DIFFERENCE IS

The Heat Retention

Our insulation is cut in full sheets and sewn into our garments - so there are never any pockets without insulation, even after washing; everything stays put.

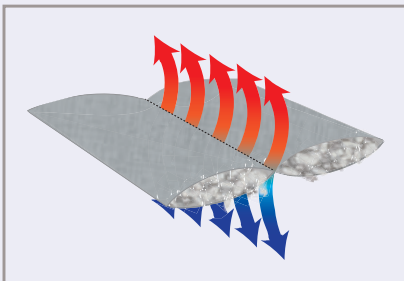

FEEL THE DIFFERENCE

TREQA uses only tight-weave sheet insulation in our jackets. Why? Because sheet insulation provides you with coverage that's both consistent and lightweight, by preventing heat-loss at stitched seams, and staying put - it won't shift or clump like down or other insulations.

HEAT LOSS COMPARISON

We took a competitors jacket under thermal view (left) and tested it against our own jacket (right). The bright areas are depicting heat-loss at the stitching, so those are areas with no insulation! With blown insulation into each stitched pocket, it's easy to see how heat-loss can occur.

OTHERS COMPETITORS

- Cooler + Hotter

TREQA™

WARMER

NO YELLOW COLORED AREA

Treqa jackets display no yellow sections. The absence of yellow highlights their ability to maintain warmth, preventing any heat from escaping.

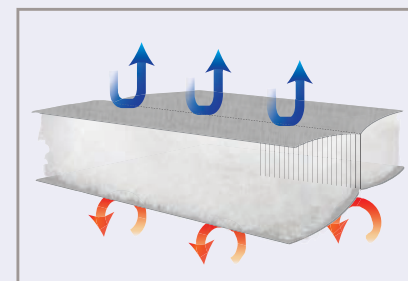

HEAT LOSS

BRIGHT YELLOW COLOURED AREAS

The bright yellow coloured areas (hot spots) in the photos show where heat is being lost through the jacket. A higher temperature means you are losing heat and warmth.

We use only sheet insulation, no bright areas means no cold spots so you've got thorough coverage and no gaps for heat-loss to occur.

- Cooler + Hotter

"In -32 degrees Celsius I walked to the store, and I was actually so toasty that I unzipped the jacket!"

- Tess from Inuvik

100% CRUELTY-FREE DOWN-FREE HYPOALLERGENIC VEGAN-FRIENDLY

At TREQA™, we believe outdoor adventures should be warm, dry, and completely worry-free. That's why our jackets are thoughtfully designed to be 100% cruelty-free, hypoallergenic, and vegan-friendly. No animals harmed, no compromises – just dependable gear crafted for every explorer.

Unlike traditional down jackets that falter when wet, TREQA™'s synthetic insulation excels in all conditions – rain, sweat, or snow. It keeps you warm no matter what Mother Nature throws your way. Plus, it's durable, easy to care for, and built to last, making it the perfect companion for any adventure.

Whether you're looking for gear that's kinder to animals, the planet, or your skin, TREQA™ is made for everyone. Our jackets are especially ideal if you have allergies to down or feathers. With TREQA™, you'll get gear that feels great, performs even better, and keeps you ready for whatever journey lies ahead.

Climate Compatible System™

At TREQA, we design jackets for every type of explorer. Choosing the right one depends on your activity level, comfort needs, and body temperature.

TREQA's CCS inner layers come in a variety of insulation ratings that can be purchased individually to suit your needs. Allowing you to customize your comfort and create the perfect jacket. The CCS Inner layers currently include:

**GSM is the weight of insulation, measured in grams per square meter.

Please keep in mind that this is merely a guide. It's an average and a starting point to consider. Comfort level will vary between individuals, depending on the activity the individual intends to engage in, and can also vary depending on the options available in your jacket.

The sleeves of our CCS inner layers are all embroidered with their insulation rating so you know exactly what warmth level at a glance.

Did you know?

Our jackets pack up light and compact for any adventure! Our insulated inner layers come with a handy packing pouch, allowing you to stuff and store your jacket for travel, taking along an extra layer in your backpack, or to save space in your closet.

Customize your comfort

Interchangeable Jacket system

The weather may be unpredictable, but with TREQA's Climate Compatible System™ (CCS), you're always ready. Our versatile 8 inner and 4 outer jackets are designed to adapt to any weather, activity, or individual need. At TREQA, we're committed to quality, durability, and functionality, all without compromising affordability.

Tested on our own adventures, these jackets are made to withstand the elements while keeping you comfortable. Built with pride, they're jackets we trust for our friends and family – and now, they're ready for you. The TREQA Climate Compatible System™ is a complete 7-in-3 solution.

It pairs a 100% waterproof, breathable outer shell with multiple liner options, allowing you to customize your outerwear for any season or condition.

Use the outer shell on its own to stay dry during rainy spring walks, or pair it with a lightweight 100 GSM layer for cooler fall hikes. Each piece in the CCS system – the shell and inner layers – can be worn individually or combined for ultimate protection from the elements.

With TREQA's CCS, you're in control of your comfort, no matter the weather.

Customizable liners for a perfect fit in any season.

MEN'S INNER JACKETS

Cho-oyu ^{CCS}

The Cho-oyu is 6th highest mountain in the world at 8,188m above sea level. It's situated 20 km west of Mount Everest. It means turquoise goddess in Tibetan.

A fitted and versatile polar fleece; wear it alone for mild days or zip it into your CCS shell to layer when you need a little extra. It features longer sleeves and thumb-holes, with a chest zip pocket and two inner drop pockets.

Langtang ^{CCS}

Langtang, the highest peak in the area, with an elevation of 7,234 meters (23,734 ft) is a region in Himalayas of Nepal to the north Kathmandu valley and bordering Tibet.

A warm versatile stand alone full zip puffy jacket built for cold weather. The TREQA Langtang is made with high-quality synthetic insulation which was developed for military applications. It is lightweight and does not absorb water. The synthetic microfibers are so small and the loft so high that it mimics down in its ability to retain heat without any of the disadvantages inherent in down insulation.

Jethi^{CCS}

Jethi is a traditional Nepalese term referring to the eldest daughter in a family, said to inhabit the Himalayan mountains.

A revolutionary design inspired by the Japanese Kimono, crafted from a single piece of waterproof PTFE fabric. With only three stitch lines - under each armpit and below the chest - this jacket minimizes seam lines, reducing potential leak points. Embracing the concept of fewer contact points for enhanced durability and quality, the Jethi sets a new standard in rainwear, combining simplicity with superior protection.

Langtang ^{CCS}

Langtang, the highest peak in the area, with an elevation of 7,234 meters (23,734 ft) is a region in Himalayas of Nepal to the north Kathmandu valley and bordering Tibet.

A warm versatile stand alone full zip puffy jacket built for cold weather. The TREQA Langtang is made with high-quality synthetic insulation which was developed for military applications. It is lightweight and does not absorb water. The synthetic microfibers are so small and the loft so high that it mimics down in its ability to retain heat without any of the disadvantages inherent in down insulation.

Jethi ^{CCS}

Jethi is a traditional Nepalese term referring to the eldest daughter in a family, said to inhabit the Himalayan mountains.

A revolutionary design inspired by the Japanese Kimono, crafted from a single piece of waterproof PTFE fabric. With only three stitch lines - under each armpit and below the chest - this jacket minimizes seam lines, reducing potential leak points. Embracing the concept of fewer contact points for enhanced durability and quality, the Jethi sets a new standard in rainwear, combining simplicity with superior protection.

“From Rainy Trails to Icy Horizons: TREQA Delivers Unmatched Performance”

In the heart of winter in Whitehorse, Yukon, where temperatures drop to a bone-chilling -22°C , one thing stands out: TREQA. Known for designing outdoor apparel that defies extreme conditions, TREQA has become the trusted companion for adventurers worldwide.

Founded by passionate explorers, TREQA set out to solve the problems outdoor enthusiasts face—bulky, unreliable gear and unethical production practices. Their solution? High-performance, cruelty-free, and responsibly made gear that doesn't compromise on style or functionality.

TREQA's innovative insulation technology keeps you warm without the bulk, and their gear transitions effortlessly from rugged trails to city streets. From a rain-soaked hike in British Columbia's forests to braving the icy snow in Inuvik, real customers share the same story: TREQA delivers.

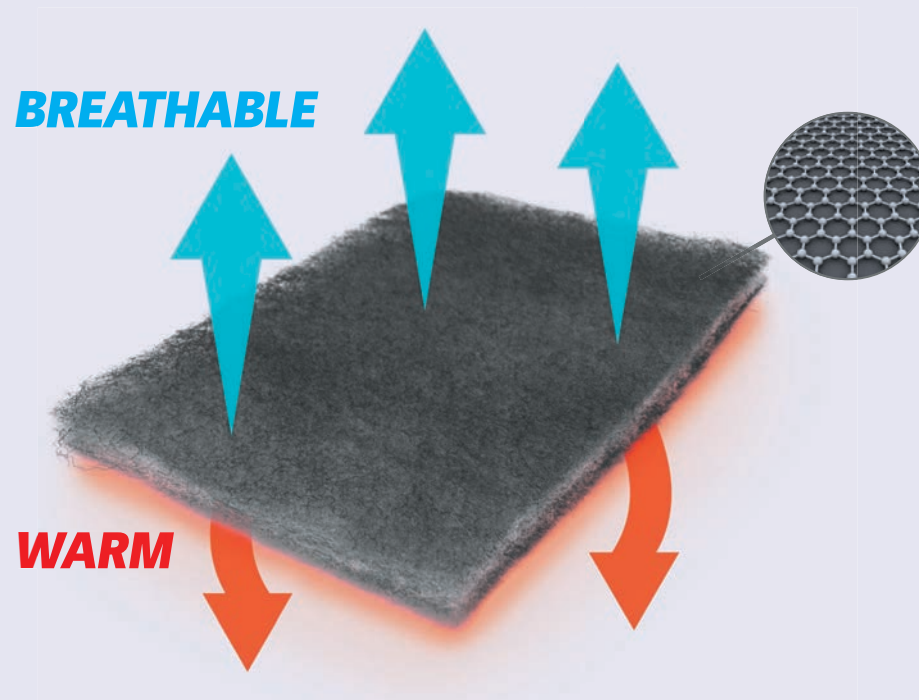

But it's not just about performance. Every TREQA product reflects a commitment to ethical manufacturing and durable design. Made to last, TREQA gear empowers adventurers to embrace the unpredictable while protecting the planet they explore.

Wherever your journey takes you, TREQA ensures you're ready. Adventure confidently—because TREQA has your back.

TREQA's Carbon Insulation Sheet

Discover the next evolution in outdoor apparel with carbon insulation. This breakthrough in material science transforms carbon from a laboratory innovation into a game-changing feature in our gear, delivering unmatched thermal insulation, breathability, and an ultra-lightweight design.

Carbon is extraordinary—a single layer of atoms in a hexagonal pattern that's stronger than steel, yet flexible and lightweight. This remarkable material doesn't just stop at strength; its thermal conductivity evenly retains and disperses heat, offering unparalleled comfort. We're incorporating carbon insulation into our next collection,

not just to improve performance but to redefine what apparel can do. This is more than innovation—it's a step toward a sustainable future, where design meets function to enhance every outdoor adventure. Join us in shaping the future of exploration.

Why TREQA's Carbon Insulation?

Superior Thermal Regulation

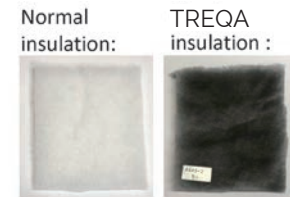

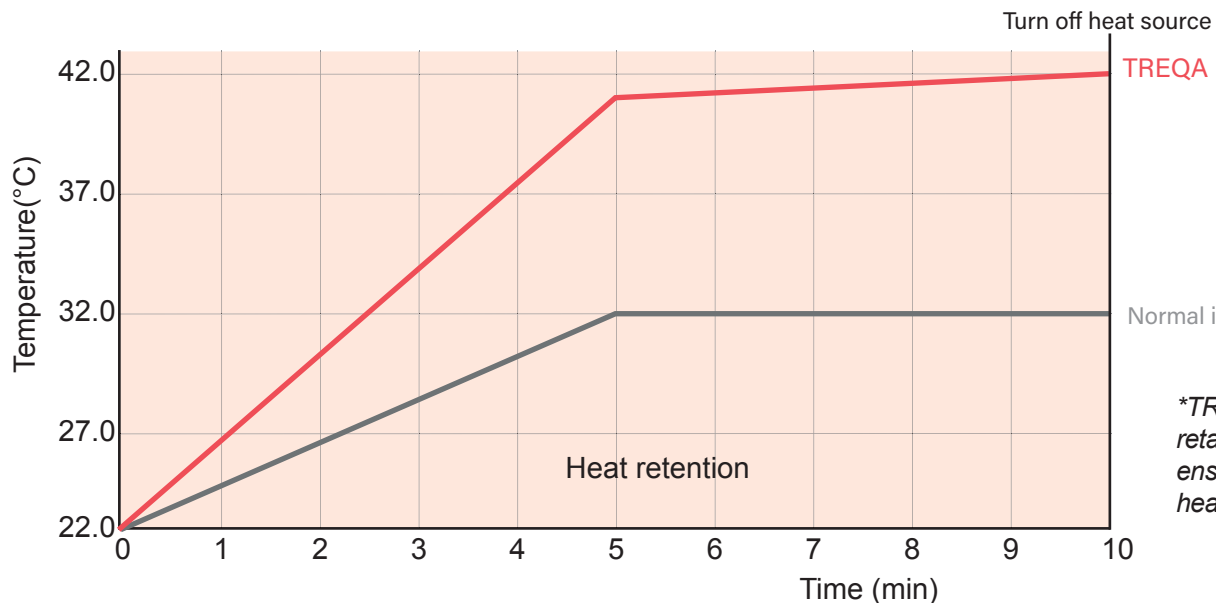

Stay perfectly comfortable, no matter the weather. Carbon's unique ability to evenly distribute heat ensures our apparel adapts to your needs—keeping you cozy during chilly winters and refreshingly cool in warmer conditions. Experience a new level of comfort like never before.

Enhanced Durability

Given its strength, carbon-reinforced gear and apparel promise longevity. Whether you're trekking rugged terrains or navigating urban jungles, trust our collection to be your reliable companion.

Lightweight & Flexible

Powerful protection, featherlight feel. Our carbon insulation offers robust durability without bulk, ensuring unrestricted movement. Whether you're scaling mountains or running errands, experience effortless comfort that fits your lifestyle.

**TREQA insulation redefines warmth. Our gear retains heat 9.6°C better than regular insulation, ensuring you stay warmer for longer—even after the heat source is gone.*

Eco-friendly

Production and integration in our products are done responsibly. As we aim for sustainability, incorporating carbon allows for longer-lasting products, reducing the need for frequent replacements and minimizing waste.

Breathability & Moisture Management

Stay fresh, stay active. The microscopic pores in carbon fabric wick moisture away, keeping you dry and comfortable no matter how intense your adventure gets.

Antibacterial

Providing protection against a diverse range of bacteria, fungi, and viruses. This broad-spectrum antibacterial activity elevates the hygiene and safety standards for all outdoor adventurers.
